Hiring Manager
Canada Pension Plan Investment Board (CPP Investments)
Toronto, ON

Dear Hiring Manager,

I am writing to express my strong interest in the Junior Engineer Internship within the Technology & Data department at CPP Investments for the Fall 2026 term. As a Business Technology Management student at Toronto Metropolitan University with a proven track record in full-stack development and strategic data analysis, I am eager to contribute to a team that manages a single mandate: delivering strong, sustainable returns for generations of Canadians.

What draws me to CPP Investments is your commitment to leveraging cutting-edge technology—such as Cloud Engineering and AI—within a disciplined investment philosophy. My background uniquely prepares me to contribute to this mission through:

- **Technical Engineering Expertise:** In my previous role as a Full-Stack Developer at Growth Pilot, I architected and delivered 11 end-to-end web solutions. I have hands-on experience with **Python**, **SQL**, and **AWS**, and I am particularly adept at implementing **AES-standard security protocols**. I understand that at CPPIB, engineering is business-aligned; I don't just build systems, I build solutions that meet evolving business needs.
- **Agile Delivery & Scalability:** I thrive in high-performance, **Agile** environments. Whether I am managing the full SDLC for a client portal or integrating third-party APIs to streamline real-time data synchronization, I prioritize speed without sacrificing reliability—a mindset essential for Quality Engineering and continuous software delivery.
- **A Hybrid Perspective:** My BTM degree and experience as a **5x Case Competition Finalist** have sharpened my ability to translate technical data into critical business decisions. This "hybrid" edge allows me to collaborate effectively across front and back-office teams, ensuring that the technology stack directly supports the fund's long-term horizon.

I am a motivated, analytically-minded individual who holds myself to high standards of rigor and collaboration. I am particularly excited about the opportunity to learn from world-class leaders at CPPIB and to apply my skills in Java, Angular, and low-code solutions to drive cloud maturity and system excellence.

Thank you for your time and consideration. I look forward to the possibility of discussing how my technical background and passion for the finance industry can add value to the Technology & Data team.

Sincerely,

Kevin Deshapriya
