

INDEPENDENT TASK: Can You Afford to Grow Up? (marks out of /20)

Instructions for Students:

PART A: The "Adulting" Scavenger Hunt

Go around your house (or look online) and find the following items. Write down the cost.

1. **A Bill:** Find a hydro, water, or internet bill. Write down the **Total Amount Due**.
2. **Cleaning Product:** Find the laundry detergent. How much does a replacement bottle cost?
3. **The "Emergency" Stash:** Where are the flashlight/candles kept?
4. **A Document:** Who holds your passport/birth certificate: you or your parents?

PART B: The "Price is Right" Challenge

Scenario: You have moved out. You earn minimum wage (\$2,400/month take-home).

Step 1: Find a Home

- Go to **Kijiji** or **Facebook Marketplace**. Find a real apartment in your city.
- **Q1:** What is the rent? Does it include utilities?

Step 2: The Grocery Run

- Go to **Walmart.ca**. Add 1 week of food to your cart.
- **Q2:** What is the weekly total? Multiply by 4 for the monthly cost.

Step 3: The Bills

- **Q3:** Look up the monthly cost for: Internet + Phone Plan + Netflix/Spotify.

PART C: The Verdict

- **Math:** Income (\$2,400) - Rent - Food - Bills = **\$_____**
- **Reflection:** Based on your final number, explain why so many "Boomerang Kids" exist in Canada today in your own words (3-4 sentences).

Category	Level 1 (50–59%)	Level 2 (60–69%)	Level 3 (70–79%)	Level 4 (80–100%)
Knowledge & Understanding <i>(Did you find the items?)</i>	Missing several items from the Scavenger Hunt.	Found most items, but some details (costs/brands) are missing.	Found all items with accurate details and costs.	Found all items and provided specific, highly detailed evidence (e.g., exact brand/cost).
Thinking & Inquiry <i>(The Research & Math)</i>	Budget calculation has major errors or is missing steps.	Budget is calculated but relies on guesses rather than research.	Budget is calculated correctly using real data found online.	Budget is calculated with high precision; research is realistic and thorough.
Communication <i>(Clarity)</i>	Reflection is short/unclear or uses text-speak.	Reflection is understandable but lacks depth or proper terms.	Reflection is clear and uses terminology (e.g., "Boomerang Kid").	Reflection is professional, articulate, and perfectly uses course terminology.
Application <i>(Making Connections)</i>	Struggles to connect the math to the concept of "Growing Up."	Connects the math to their life in a simple way.	Clearly connects the high cost of living to why people stay home.	Insightfully analyzes how economic factors force "Emerging Adulthood" to happen.
